Summary

An ISTQB Certified innovative tester having 7 years experience in software quality assurance of Web, Mobile applications and APIs . Well versed with manual testing concepts and experienced in automation testing. Definite roles and experience of Test Analyst, Test planning, QA Reviewer.

Core :
Functional testing, Test planning, Test execution, API testing, Exploratory testing, Agile, Automation testing, Microservices, JIRA, Hybrid cloud architecture, SQL, DS, Algo, Black box tesing , Grey box testing

Languages : Java, Node.js

Tech Stacks:
Selenium, TestNg, Cypress, restassured, Postman, Jmeter, GCP, AZURE, Kubernetes, Docker, Jenkins, CICD, azure SQL server, redis, multi cloud, robot

Experience in working with web based system, Siebel, hadoop ecosystem, KAFKA, Kibana, Elasti Search based environment

Creating, strategize and prioritising tasks and scenarios to get efficient results and maximum coverage in shortest duration. Identifying Automation Scenarios.

Team player with leadership skills to motivate the team and help them out during critical situations. Regularly interact with team members to build confidence and interactive environment to have a cordial working environment.

Experience

Uber

3 years 3 months

Staff Production Management Engineer

September 2026 - Present (2 months)
Bengaluru

Senior Production Management Engineer

August 2023 - September 2026 (3 years 2 months)
Bengaluru

Quality and Resilience of Production

Lendingkart

Senior SDET

January 2023 - August 2023 (8 months)
Bengaluru, Karnataka, India

Walmart Global Tech India

Quality Engineer III

August 2020 - December 2022 (2 years 5 months)
Bengaluru, Karnataka, India

Test new features for inhouse developed machine learning platform and data visualization tool

Designed and developed automation framework using Cypress for API and UI test scenarios , enable and run automated regression tests on non prod environments and sanity tests on prod environment.
Exposed of working in multi cloud architecture which includes AZURE, GCP and ONPREM

Requirement gathering from product team and stakeholders for functional testing of new features and certify it for production releases.

Ola

SDET II

April 2019 - July 2020 (1 year 4 months)

Tata Consultancy Services

System Engineer - Test

December 2015 - March 2019 (3 years 4 months)
Bangalore

Perform Functional Testing , Test case analysis, Test Review, Security testing, Automation testing and performance testing.
Create automation scripts for web applications and rest APIs using selenium with java. Run the sanity and regression automated scripts for every release and generate reports.
Perform performance testing for APIs using Jmeter.

During my trainee duration single handedly gave a client overview of security testing which led to successful closure.
Designed an Automation framework for automation testing of OBIEEE MIS reports
Active participant with client side discussion.

Education

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech.), Electrical and Electronics Engineering · (2011 - 2015)
